I T is now decided by the best Machinests and the public generally, that these Machines embrace the latest and important improvements ever attached to Sewing Machines: the New Improved Never-Failing Looper, and Reverse Wheel. The have these important improvements, which now give them the preference over all others. Every one should examine and thoroughly test them before making their selection, as they are rapidly taking the place of all others. In these Machines we do away with all the complicated SCREWS, WIRES, SHUTTLES, BOBBINS, CROOKED and CIRCU-LAR NEEDLES, of other machines, which render them at once greatly superior to any heretofore offered the public, for the many different kinds of family and manufac-

turing purposes.

These Machines make the double-lock, fast stitch-a stitch that will not rip or ravel, though every fourth on be cut. This stitch is stronger and more elastic than tha made by hand. It is decided by competent Judges to be more than twice as strong as the stitch made with shultle The great room under the arm renders them desirable for large work, and various kinds of quilting purposes. These Machines make the only stitch with which you

On these Machines you can use any kind of spool silk, cotton or linen thread. These Machines are almost noiseless in operation.
